2006 The 2nd Korea-Sweden Workshop on Intelligent Systems for Societal Challenges of the 21st Century

November 16-17, 2006
Lilac Hall, 3F, Hotel The Shilla Seoul
Seoul, Korea

General Chair

Sukhan Lee

Program Chair

Il Hong Suh

Organized by

BK21 IT-HRD Center, ICE, Sungkyunkwan University
Advanced IT Education Program on Industrial Demand, Hanyang University

Co-Organized by

The 21st Century Frontier Research Program on Intelligent Robots

Sponsored by

Korea Science and Engineering Foundation
Swedish Foundation for Int'l Cooperation in Research and Higher Education

● Overview

As the return workshop, this workshop continues further interactions between Sweden and Korea participants in the direction set by the first workshop in Stockholm and move forward from what was done. Same as the first meeting, we may group individual participants into two: professor group and doctoral student group, for better discussions before final integration. The subject of discussions include 1) identification of topics for possible research collaboration or joint research, 2) exchange of students, post docs, and professors, 3) identification of methods for collaboration in teaching/training, 4) organization of joint events such as international competitions, seminars/workshops, symposiums, etc. However, in the return workshop, it is expected to see the development of more concrete ideas of and possible match-makings for the partnership between Sweden and Korea side in the aforementioned categories of collaboration.

● Special Thanks

My special thanks to the Korea Science and Engineering Foundation and Swedish Foundation for International Cooperation in Research and Higher Education for their generous support for this workshop.

Sukhan Lee
Professor and Director
